v1.0.0 | PlenumNET v2.1 | Phase 4 Complete | February 2026

Quantum-Resistant eSignatures for the Enterprise

Enterprise-grade platform with post-quantum cryptography — protect your documents against today's threats and tomorrow's quantum computers. Future-proof your most sensitive agreements with CNSA 2.0 encryption, ML-DSA digital signatures, femtosecond-precision audit trails, and zero-knowledge proof verification.

POWERFUL DOCUMENT WORKFLOWS

- Create envelopes with multiple recipients
- Assign signer, viewer & witness roles
- Upload PDF, DOCX, XLSX, CSV — auto-...
- PDF Stapler: merge & stitch with pdf-lib
- Drag-and-drop signature, date, text fields
- Typed input (8 custom fonts) or freehand
- Sealed PDFs with embedded custom fonts
- Certification page: sigs, times, audit log
- Branded email notifications (Resend API)
- Dark/light modes, Swiss Banker aesthetic
- Site-wide zoom control (70%–130%)
- WBS tag management & envelope tagging
- Reusable document templates

QUANTUM-RESISTANT SECURITY

- CNSA 2.0: AES-256-GCM / HKDF-SHA512
- ML-DSA post-quantum sigs (FIPS 204)
- Signed at upload, each sign & final seal
- PlenumNET dual-phase encryption pipeline
- Forward secrecy vs. quantum threats
- HTPP femtosecond-precision timestamps
- IP geolocation on every signing event
- Zero-knowledge proofs (Groth16 → WASM)
- Verify authenticity without exposing data
- TLS 1.3 encryption for all data in transit
- 8 database tables: field-level encryption
- Defense-in-depth security architecture
- Row-level security for tenant isolation

ENTERPRISE COMPLIANCE

- ESIGN Act & UETA — all 50 U.S. states
- PIPEDA, UECA — Canada (federal + prov.)
- eIDAS Advanced Electronic Signatures
- UNCITRAL Model Law — intl. recognition
- 21 CFR Part 11 — FDA regulated industries
- SOC 2 Type II equivalent controls
- PostgreSQL row-level security isolation
- Encrypted at rest + in transit (TLS 1.3)
- Audit trail with geo-data & HTPP times
- Multi-tenant data isolation at DB level
- Femtosecond-precision access logging
- Tamper-evident sealed PDF certification
- Complete quantum-resistant auth chain

PDF STAPLER Built-in

Merge multiple PDFs into a single unified file.
Drag-and-drop page reordering, lossless via pdf-lib.

DOCUMENT CONVERTER Built-in

Auto-convert DOCX, XLSX, CSV to PDF on upload.
LibreOffice headless — preserves formatting & tables.

DEFENSE-IN-DEPTH SECURITY MODEL

Dual-phase encryption across all DB tables • Every sensitive field encrypted: CNSA 2.0 HKDF-SHA512 / AES-256-GCM
Document payloads via PlenumNET quantum-resistant pipeline • ML-DSA signatures from upload to final certification
PostgreSQL row-level security for multi-tenant isolation • All events logged with HTPP timestamps & IP geolocation
